

Team Augmentation Services

Unleash Your Project Delivery Potential with myP3

WHAT TEMPORARY RESOURCES CAN WE PROVIDE?

myP3's Team Augmentation Service helps you supplement your in-house resources with temporary project, program and ICT specialist skills capacity as and when required.

We provide this service only to our existing clients who require short- or longer-term assistance to leverage either our in-house personnel when capacity avails, or perhaps you have already identified your own candidate and require a mechanism for engagement. We can also source directly from the market through our trusted connections and direct contacts.

VALUE

Projects and programs are finite and temporary by nature, and portfolios fluctuate requiring scalability on demand. We alleviate your investment in long-term or permanent resources by providing the right skills for fixed durations.

With our understanding of your environment, culture, and expectations, we put forward quality temporary resources for your consideration and, upon selection, we take care of the rest. As a consultancy with available capacity from time to time, a wide range of connections and known 'good operators', and as a registered labour hire

provider (Qld) we have the credentials and structure to support our clients with team augmentation needs.

This service helps our clients' deliver their projects, programs and portfolios efficiently and effectively to achieve objectives.

SERVICES

PROJECT / PROGRAM SKILLS

Provision of experienced and qualified professionals to assist with the planning, management, control, delivery and closure of projects and programs.

PMO SKILLS

PMO augmentation includes project and program controllers, administrators, agile coaches, and more.

BUSINESS-FACING SKILLS
